PROFESSIONAL SUMMARY

Data Science undergraduate at Universitas Airlangga with hands-on experience in machine learning, natural language processing, data mining, and data-driven web applications through coursework, competitions, and independent projects. Built end-to-end solutions using Python, SQL, PyTorch, scikit-learn, Flask, and Laravel, with portfolio work spanning translation systems, legal-text prediction, computer vision, survival analysis, and dataset quality tooling. Seeking internship opportunities in Data Science, Machine Learning, or Analytics.

EDUCATION

Universitas Airlangga - Surabaya | B.Sc. in Data Science Technology | 2023 - Expected 2027

- Relevant focus: Data Mining, Machine Learning, Natural Language Processing, Database Systems, and Data Analysis.
- Active in academic projects, student organizations, and technology competitions during undergraduate study.

SMAN 8 Surabaya | Science Track | 2020 - 2023

- Ranked in the top 5 of the science cohort during senior high school.

TECHNICAL SKILLS

Programming: Python, R, SQL, JavaScript

ML / Data Science: PyTorch, TensorFlow, scikit-learn, NLP, deep learning, data mining, image processing, time series analysis

Web / Software: Flask, Laravel, REST API development, HTML, CSS, JavaScript, Tailwind CSS, Three.js, Git

Data / BI Tools: Jupyter Notebook, Tableau, SPSS, MySQL, Google Workspace, Microsoft Office

Design Tools: Canva, Adobe Photoshop, Adobe Illustrator, Premiere Pro, CapCut

SELECTED PROJECTS

March Machine Learning Mania 2026 | *Python, XGBoost, Flask*

- Built an end-to-end machine learning pipeline and interactive Flask dashboard to predict NCAA tournament matchups using historical statistics, dynamic Elo ratings, and consensus expert rankings.
- Generated more than 650,000 matchup features in under 4 seconds and achieved calibrated Brier Scores of 0.0940 for the men's model and 0.0624 for the women's model.

Find IT! 2026 Face Anti-Spoofing Workflow | *PyTorch, timm, Streamlit, Computer Vision*

- Developed an end-to-end Kaggle competition workflow for 6-class face anti-spoofing covering EDA, semi-automated data cleaning, multi-backbone training, and robust ensemble selection.
- Reached a best public score of 0.76298 and documented the trade-off between public leaderboard optimization and private leaderboard robustness.

Warisan Nusantara: Indonesia-Madura Neural Machine Translation | *PyTorch, Flask, Hugging Face, Whisper, Three.js*

- Built a bidirectional neural machine translation web application for Indonesian-Madurese translation with an interactive interface and deployment-ready demo flow.
- Integrated OpenAI Whisper for speech-to-text input to support multimodal usage beyond typed text.

Court Sentence Duration Prediction - Dataquest 4.0 | *Python, NLP, scikit-learn*

- Developed a legal-text prediction pipeline to estimate sentence duration from 23,675 court documents for the Dataquest 4.0 competition.
- Engineered hybrid text features and combined 6 machine learning models in a weighted ensemble for more robust prediction performance.

Dataset Doctor | *Python, CLI, HTML Reporting*

- Developed an open-source Python CLI for first-pass dataset quality inspection, generating terminal summaries, Markdown reports, and browser-ready HTML dashboards.
- Implemented contextual checks for missing values, duplicates, semantic column roles, and numeric outliers to make dataset review faster and more actionable.

Additional portfolio highlights: WiDS Global Datathon 2026 survival modeling for wildfire threat timing; music genre classification with ensemble deep learning (65.79% accuracy on 758 audio files across 9 genres); and Warung Padi, a Laravel-MySQL rice supply-chain management platform with inventory, e-wallet, and analytics features.

LEADERSHIP & CAMPUS INVOLVEMENT

Head of Graphic Media Information, HIMATESDA | Feb 2025 - Jan 2026

- Led the visual communication stream for the association by coordinating design output, promotional assets, and digital content across organizational initiatives.
- Supported branding consistency and content planning for department campaigns and student engagement materials.

Media Information Staff, HIMATESDA | Feb 2024 - Dec 2024

- Produced posters, feeds, and event documentation materials for student association programs and media channels.
- Served as person-in-charge for TSD Archives and LinkedIn content coordination.

Creative Staff, TSD Executive Board | 2023 - Present

- Managed Instagram content for Vidyadatum and designed promotional materials for internal student activities.

SELECTED COMMITTEES & EVENT ROLES

Creative Publication Staff, BINARY 4.0 | Jul 2024 - Sep 2024

- Designed committee merchandise, social media feeds, virtual backgrounds, and photo frames, and supported event documentation and teaser production.

PDD Design Staff, KARSA FTMM 2024 | Jun 2024 - Aug 2024

- Contributed to handbook design, assignment book design, live-report frames, event pins, and cue cards for faculty orientation activities.

Creative and PDD Coordinator, URBAN HIMATESDA | Oct 2024 - Nov 2024

- Coordinated live-report visuals, certificate design, and event documentation for a student social initiative program.

Content Team, Data Dialogs HIMATESDA | Mar 2024 - Dec 2024

- Helped prepare podcast content ideas, engagement games, and supporting media for student-facing discussions.

ADDITIONAL PROJECT HIGHLIGHTS

- WiDS Global Datathon 2026: survival-analysis modeling for wildfire threat timing across 12h, 24h, 48h, and 72h horizons using early-fire signals.
- Music Genre Classification with Ensemble Deep Learning: achieved 65.79% accuracy on 758 audio files across 9 genres.
- Warung Padi: developed a Laravel-MySQL rice supply-chain management platform with multi-role workflow, inventory management, e-wallet, and analytics dashboard features.

ADDITIONAL INFORMATION

Career interest: Data Science Internship, Machine Learning Internship, Data Analyst Internship.

Portfolio: Active public portfolio on LinkedIn, GitHub, and Kaggle with coursework, competition, and independent project outputs.
